GUARDIAN INNOVATION... CHANGING THE WAY YOU LOOK AT GLASS

# GUARDIAN SHOWERGUARD™

## THE DIFFERENCE IS CLEAR...

UNPROTECTED GLASS

SHOWERGUARD PROTECTED  
GLASS

Untreated glass is susceptible to damage and aging effects when exposed to hard water, soap, organics and humidity. Glass chemically reacts with these contaminants to create spots, residues, stains and scale build-up. Over time, this chemical corrosion permanently damages the glass. ShowerGuard seals the glass to prevent chemical corrosion.

## SHOWERGUARD KEEPS YOUR GLASS LOOKING LIKE NEW!

ShowerGuard is a permanent coating that never needs to be replenished after installation unlike competitive products. ShowerGuard eliminates:

- Time consuming maintenance
- Corrosive cleaning products
- The need for special after care products

# SHOWERGUARD PRESERVES THE LOOK AND BEAUTY OF NEWLY INSTALLED GLASS.

SHOWERGUARD IS THE INDUSTRY'S FIRST PERMANENT,  
TEMPERABLE SHOWER GLASS PROTECTION PRODUCT.

- Stock sheet program
- 10-Year warranty
- Handles like clear glass
- No edge-deletion required

AVOID ADDED PRODUCTION STEPS, COMPLEXITY AND  
HIDDEN COSTS TO YOUR OPERATION...

ELIMINATE THE HASSLE OF FACTORY APPLIED SPRAY-ON COATINGS

USE SHOWERGUARD TO STREAMLINE YOUR  
OPERATIONS AND ELIMINATE...

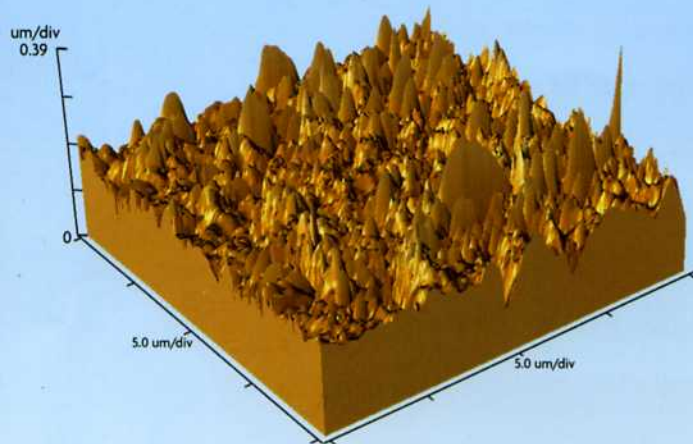

- Chemical Costs
- Warranty Costs
- Disposal Costs
- Capital Costs
- Labor Costs
- Annualized Permits
- Safety Concerns
- Royalties

SHOWERGUARD IS A TRADEMARK OF GUARDIAN INDUSTRIES

# ShowerGuard® UltraWhite™

## Low-Iron Glass

### Clarity you can see

Standard clear glass is actually far from clear. That's why we created UltraWhite™ glass. From the moment you see it, you'll appreciate what true clarity really looks like. The virtual absence of color makes UltraWhite the natural choice when neutral color and clarity count.

UltraWhite low-iron glass utilizes raw material formulas that increase light transmission and neutrality while reducing the greenish tint in standard glass that is most apparent when viewed from the edge. The thicker the glass, the more visible the green tint.

The stunning clarity of UltraWhite makes it the glass of choice for homeowners and design professionals wanting an open, contemporary look in their luxury bath retreats. Ideally suited to clear, heavy-glass frameless enclosures, UltraWhite lends improved color consistency between shower walls and their exterior matching surrounds.

Now Guardian Industries introduces ShowerGuard® UltraWhite™, a revolutionary new glass technology. Hard water, heat, humidity and other typical shower conditions can spot, discolor and eventually corrode the surface of normal glass. ShowerGuard's patented ion beam process seals the glass surface during manufacturing, stopping corrosion before it starts. Unlike some protective treatments that can require continual re-application, ShowerGuard never needs to be reapplied. Which means with just a minimal amount of cleaning, your ShowerGuard UltraWhite glass will look beautiful for years to come.

**SHOWERGUARD®**  
FOREVER BEAUTIFUL

ShowerGuard™ glass.  
Squeaky clean just got easier.

**SHOWERGUARD™**  
FOREVER BEAUTIFUL

No matter how hard you try  
to keep standard shower glass  
clean, eventually it gets ugly.

ShowerGuard glass is  
incredibly easy to clean  
and keep beautiful.

You can scrub your fingers to the bone cleaning standard shower glass, yet it will never be as clean as the day it was installed. That's because hard water, heat, humidity, soap and even cleaning agents can spot, discolor and corrode the surface of the glass. In other words, the things you use to clean your glass can actually make it look worse.

But ShowerGuard glass is a different kind of glass altogether. Its surface is protected during manufacturing through an ionic-bonding process. This patented technology permanently seals the glass surface, stopping corrosion before it starts. Which means with just a minimal amount of cleaning, ShowerGuard glass will always look as gorgeous as it did the day you bought it.

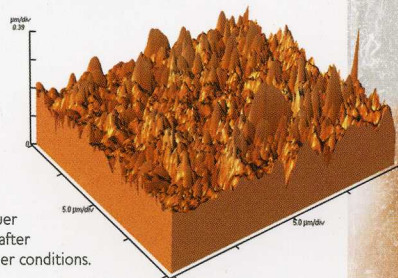

**SHOWERGUARD™**  
FOREVER BEAUTIFUL

Standard glass corrodes,  
leaving it full of tiny pits  
and ridges that attract  
and hold scum.

Hard water, cleaning products and even the soap  
and shampoo you use every day can take a toll on  
standard shower glass. Constant exposure to  
these contaminants causes a chemical reaction  
that actually roughens the surface of the glass.  
When that happens, spots, residues, stains and  
scale build up,  
and it becomes  
almost impossible  
to keep your  
glass clean.

Magnified standard shower  
glass showing corrosion after  
exposure to typical shower conditions.

ShowerGuard glass  
resists corrosion,  
so scum has nothing  
to grab on to.

The surface of ShowerGuard glass is ionically  
bonded to seal the surface against attack  
from chemicals and shower contaminants.  
Which means your glass remains smooth  
and easy to clean. And unlike spray-on or  
wipe-on treatments that eventually come  
off, the coating on ShowerGuard glass  
is permanent.  
So your shower  
stays beautiful  
forever.

Magnified ShowerGuard  
glass after exposure to typical  
shower conditions.
